

NEW PRODUCT LAUNCH!

M5041 SIDE ENTRY MIXER/AGITATOR WITH EXTERNAL SHUT OFF DEVICE

Based on the successful model M5040 Side Entry mixer/agitator for the wine industry and our large M5000 mixer/agitator for large tank applications we have developed a new model for tanks up to 250m³ which can be serviced without the need to empty the tank contents.

Mixtec 5041 Side Entry Mixers WITH EXTERNAL SHUT OFF DEVICE: Specifically designed for the wine industry, this cost effective and energy efficient mixer is fitted with our low shear Mixtec HA700 hydrofoil impeller ensuring maximum flow rates using minimum motor power. A compact design with stainless steel angled mounting stool and curved face mounting flange allows for simple installation and ensures the correct flow patterns throughout the tank.

FITTED WITH EXTERNAL SHUT OFF DEVICE which allows replacement of the mechanical seal and/or servicing of the geared motor without the need to empty the tank.

Mixers/agitators/rousters in wine tanks create continuous flow and mixing or blending in the tanks, used for;

- Wine storage maintaining homogeneity
- Wine blending
- Fermentation reducing CO₂ build up
- To enhance cold stabilisation
- To eliminate temperature stratification

COVERS REMOVED FOR ACCESS TO THE SHUT OFF DEVICE
